Take Care of Your Hair before you lose it

Don't wait until the horse is gone to lock the stable door, but lock it while you still have the horse. In other words, look after your hair now—don't let it get dry and harsh—don't let dandruff gather in your scalp—don't let your hair fall excessively without doing something for it. Baldness, or at the very least, thin hair is bound to follow such symptoms. It's a million times easier to save hair than to get it back.

Dandruff-ene

(Meyer)

is just exactly what the name implies—it is a germicide and plainly, it kills germs. Dandruff is a germ disease—falling hair is a germ disease—gray hair is a germ disease—baldness is a germ disease. Very well then, kill the germs and you can prevent the trouble.

Our preparation doesn't make hair but it saves it. Strengthens and nourishes the hair follicles and cleanses the scalp of disease germs.

Today is none too soon to buy a bottle
